## **2013 FLIGHT SCHEDULE**

### What We've Been Up To

We have been pretty busy with a number of environmental projects this winter, but we're ready to get going for the ag season. We're looking forward to working with you again this year and to building off of our successes from last year.

### Spring/Summer 2013 Flight Schedule

- March 12 (optimal soil mapping timing)
- May 27
- June 17
- July 8
- July 22
- August 19
- September 9

As always, flight schedules are subject to change based on weather conditions. Special flight requests can be accommodated with minimum orders.

To order a flight, fax a field location map and a flight request to (530) 758-0576 or call (530) 758-0579.

### Crop and Application Specific Literature

We are compiling application sheets for each major crop and application we have developed. These application sheets include flight timing, costs, benefits and "how to" information. Crops include: Alfalfa, Almonds, Carrots, Corn, Cotton, Grapes, Pistachios, Rice, Stone Fruit, Tomatoes, and Walnuts. Applications include: Soil Amendments (Sulfur/Lime/Gypsum), Sulfuric Acid, Pre-plant fertilizer, Side Dress Fertilizer, Foliar Sprays, Variable Rate Pix in Cotton, Selective Ethryl Application in Tomatoes, Selective Nematicides, Dairy Nutrient Budgeting, Permanent Crop Development, Crop Maturity Management in Grapes, Selective Harvest in Grapes, Irrigation System Distribution Uniformity Audit (pressurized), Irrigation System Distribution Uniformity Audit (flood/furrow), Yield Projection and Field Economic Optimization.
