

Digital Imagery in the Field

- Geo.pdf format displays on several applications and retains the geographic intelligence of the image. Geo.pdf capabilities include:
 - Scroll across the map shows the geographic coordinates in lat/lon of the cursor,
 - Use with a GPS enabled device and use roving map capabilities in the field,
 - Attach geo-tagged field photos, field notes, document files and audio comments that show the location in the image they are attributes to,
 - Do area and length measurements on the image or in the field,
 - Walk or digitize area boundaries and assign prescriptions (great for selective application prescriptions),
 - Do GIS data collection (e.g. weed species identification and weed pressure assessment for a herbicide program development), and,
 - E-mail field information (geo-tagged pictures/audio/data acquisition) back to the office GIS or forward to your Agronomist or Managers/Owners.
- Plug-in for Adobe Acrobat and runs on any PC based computer, laptop or PDA, Droid compatible devices and on iPhones, iPads and iPod Touch
- E-mail ag-recon@ag-recon.com to request a free download
